IBM Professional Java Developer (2025 - 2026)

🐍 Python Certification

Microsoft Python Development (2026)

Afpa Full-Stack Web

Developer Diploma

Associate's Degree in Web Development (2021)

👤 Summary

Full-stack developer with strong experience in backend engineering and modern web technologies. I build scalable, maintainable applications using **Java (Spring)**, **Python (Flask)**, **JavaScript (React JS)**, and **SQL** or **NoSQL** databases.

My background in programming and functional analysis gives me a unique ability to solve complex problems with rigor and precision.

I am seeking a backend or full-stack role where I can contribute to robust, production-ready systems.

🧰 Experience

Full-Stack Developer | Novocib | Sep 2025 - Jan 2026

- Improved SCO and developed internal back-office tools.

Developer SAGE X3 | Kardol | Oct 2024 - Apr 2025

- Development on ERP Sage X3 using L4G, SQL & REST API.

Full-Stack Developer | Novocib | Feb - May 2024

- Designed and built the company's entire website.
- Developed a custom back-office (Laravel, MySQL, JS, Bootstrap).

Web Developer | Fly'IT | Oct - Nov 2023

- Created the company website from scratch (HTML, CSS, JS, PHP, MySQL).
- Delivered features based on client feedback.

Functional Analyst N2 | CGI | Jul 2022 - Oct 2023

- Diagnosed and resolved issues on CAO software used by EDF engineers.
- Provided user support and bug resolution.
- Developed automation tools (Python, PowerShell).

Avionics Engineer | French Army | 2010 - 2021

- Diagnosed and repaired electronic systems on helicopters.
- Assisted with aircraft startup and troubleshooting.
- Managed onboard IT systems in English.
